

## **PASTAFARIAN SIDE**

[Please read this excerpt from the Church of the Flying Spaghetti Monster' website to explain Pastafarianism]

Religious texts tell us that humans evolved from Pirates. Consider that so-called "science experts" would have us believe humans evolved from primates, pointing towards the shared 99% shared DNA between humans and primates. But humans and Pirates share upwards of 99.9% of DNA.

We believe that Pirates were the original Pastafarians and that they were peaceful explorers. It was only due to Christian misinformation that they have an image of outcast criminals today.

No one knows what the afterlife really holds, but we are told FSM Heaven has a Beer Volcano and Stripper Factory.
